

Gym Management Web Application

Software Requirements Specification (SRS)

Project Name: Gym Management Web App

Document Type: Functional Requirements Document

Version: 1.0

1. Authentication Module

1.1 Objective

The Authentication module will provide secure access to the Gym Management Web App. Authorized users will be able to log in using their email address and password and reset their password when required.

1.2 Functional Requirements

Login Page

The application shall provide a Login page with the following fields and functionality:

Field / Functionality	Description
Email	User enters a registered email address.
Password	User enters their password.
Login Button	Authenticates the user and redirects them to the application dashboard upon successful login.
Forgot Password	Navigates the user to the Forgot Password page.

Forgot Password Page

- The user shall be able to request a password reset using their registered email address.
- The system shall provide an appropriate confirmation message after a valid reset request.
- The user shall be redirected to the Reset Password flow.

Reset Password Page

- The user shall be able to enter a new password and confirm the new password.
- The system shall validate the password according to the defined password policy.
- The system shall update the password after successful validation.
- The user shall be able to log in using the new password.

1.3 User Setup

- Create one or two static user accounts for initial testing and client demonstration.
- Provide the required login credentials to the client through a secure channel.
- Define the initial user role and permissions.

Note: The final authentication method, password policy, and password-reset mechanism shall be confirmed before development.

2. Member Management Module

The Member Management module will allow gym staff to register new members, view existing member records, and edit member information.

2.1 Member Listing Page

The application shall display all registered gym members in a list view.

Listing Page Components

- Page title: Members
- Add New Member button
- Member records table
- View and Edit actions

Table Columns

Column	Description
Sr. No.	Serial number of the member record.
Name	Full name of the gym member.
Package	Selected membership package.
Start Date	Membership start date.
End Date	Membership expiry date.

Action	View and Edit buttons.
--------	------------------------

The listing page should display the latest member records and allow users to access individual member details.

2.2 Add New Member Page

The user shall be able to register a new gym member by clicking the **Add New Member** button on the Member Listing page.

Add Member Form

Field	Type / Requirement
Name	Text field; member's full name.
Phone Number	Phone number field.
Email	Email field.
Gender	Selection field.
Package	Dropdown: 1 Month, 3 Months, 6 Months, 12 Months.
Price	Automatically populated based on the selected package.
Save Button	Saves the new member record.

2.3 Package and Price Logic

The system shall provide the following membership package options:

Package	Duration	Price
1 Month	1 month	To be configured
3 Months	3 months	To be configured
6 Months	6 months	To be configured
12 Months	12 months	To be configured

Business Rules:

1. When the user selects a package, the corresponding price shall be automatically populated.

2. The user shall not need to manually enter the package price.
3. The membership start date shall be assigned when the membership is created, according to the agreed business rule.
4. The membership end date shall be calculated based on the selected package duration.
5. The system shall validate mandatory fields before saving the record.
6. A successful save shall create a new member record and display it in the Member Listing page.

2.4 View and Edit Member

- The user shall be able to view the complete details of an existing member.
 - The user shall be able to edit member information.
 - The system shall update the member record after successful submission.
 - The system shall preserve the correct membership dates and package information.
-

3. Expiry Module

3.1 Objective

The Expiry module shall display all gym members whose membership packages have expired and have not yet been renewed.

3.2 Functional Requirements

- Display members whose membership end date has passed.
- Exclude members whose packages are still active.
- Display members whose packages have already been renewed according to the defined renewal logic.
- Provide relevant member information, including name, package, start date, and end date.
- Provide access to member details for follow-up or renewal.

3.3 Suggested Listing Columns

Column	Description
Sr. No.	Serial number.
Name	Member name.
Package	Expired package.
Start Date	Membership start date.

End Date	Membership expiry date.
Action	View member details / renewal action, if implemented.

4. Action Required Module

4.1 Objective

The Action Required module shall display members whose membership packages are approaching their expiry date and require renewal follow-up.

4.2 Upcoming Expiry Rules

The system shall identify members based on the following reminder thresholds:

Package	Reminder Before Expiry
1 Month	2 days
3 Months	5 days
6 Months	5 days
12 Months	5 days

4.3 Functional Requirements

1. The system shall calculate the remaining days until each member's package expiry.
2. Members whose remaining membership duration is within the applicable reminder threshold shall appear in the Action Required module.
3. Members whose packages are already expired shall be displayed in the Expiry module rather than as upcoming renewals.
4. Members whose packages are not approaching expiry shall remain excluded from the Action Required list.
5. The module shall display member name, package, start date, end date, and relevant action options.

4.4 Example

If a member has a 3-month package and the membership end date is five days from today, the member shall be displayed in the Action Required module.

5. Expense Management Module

5.1 Objective

The Expense Management module shall allow gym staff to record and manage gym-related expenses and view expenses for a selected month.

5.2 Expense Listing Page

The application shall provide an Expense Listing page with the following functionality:

- Display all recorded expenses in a list view.
- Provide an Add Expense button.
- Display expense details.
- Provide a month-based filter.

5.3 Add Expense Form

The user shall be able to add a new expense using the Add Expense button.

Field	Type / Requirement
Date	Date picker; date of the expense.
Description	Text field; details of the expense.
Amount	Numeric field; expense amount.
Save Button	Saves the expense record.

5.4 Expense Listing Columns

Column	Description
Sr. No.	Serial number.
Date	Expense date.
Description	Description of the expense.
Amount	Expense amount.
Action	View or Edit, if required.

5.5 Monthly Expense Filter

- The user shall be able to select a month and year.
- The system shall display expenses recorded within the selected month.
- The system shall update the listing based on the selected filter.

- The system shall display an appropriate empty-state message when no expenses are available for the selected month.
-

6. General Application Requirements

6.1 User Interface

- The application shall provide a consistent and user-friendly interface.
- All pages shall be responsive and usable on desktop and mobile browsers.
- Buttons, form fields, tables, and navigation elements shall follow a consistent design.

6.2 Form Validation

- Mandatory fields shall be validated before submission.
- Email and phone number fields shall follow the required format.
- Numeric fields such as price and amount shall accept valid numeric values.
- The system shall display meaningful validation messages.

6.3 Data Management

- Member and expense records shall be stored persistently.
- Membership dates shall be calculated consistently.
- Package prices shall be configurable rather than hard-coded wherever practical.
- The application shall prevent accidental duplicate or invalid records according to the agreed business rules.

6.4 Access Control

- Only authenticated users shall be allowed to access the application modules.
 - Unauthorized users shall not be able to access protected pages directly.
 - The initial release shall support the agreed static user accounts.
-

7. Initial Navigation Structure

1. Login
2. Dashboard
3. Members
 - Member Listing
 - Add New Member
 - View Member
 - Edit Member
4. Expiry
5. Action Required

6. Expenses

- Expense Listing
- Add Expense
